Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the originally filed specification has no mention of strings in a non-distorted shape. Although applicant alleges on page 10 of the Remarks that "the frame and strings are in a non-distorted shape" are supported in the specification, it is not clear where such support lies. While the specification refers to a goal of obtaining a distortion-free frame, there does not appear to be a recitation of strings in a non-distorted shape.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3711

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6 and 15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 1-6 and 15, as set forth above, there is no description in the originally filed specification of strings being in a non-distorted shape.

5. Claims 1-6 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-6 and 15, the meaning of "strings in a non-distorted shape" is unclear. When strings are tensioned, the elongation of the strings can be considered to be string distortion.

Claim Rejections - 35 USC § 102

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 3711

7. Claims 1-3 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 4,203,597 (Reedhead et al., hereinafter Reedhead).

Regarding claims 1-3 and 15, Figure 1 of Reedhead shows a racquet with the strings being arranged in two parallel interwoven groups and where the angle is believed to be shown to lie within the recited range; an angle within the recited range is also considered to be about 53 degrees. It is further believed that given a sufficiently low tension, both the frame and strings would be in a non-distorted shape. The claim 1 recitation providing the reasoning why the angles are chosen is not considered to have a patentably limiting effect because such statements are irrelevant in applying the prior art under 35 USC 102.

8. Claims 4-6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reedhead as applied above.

Regarding claim 4, some prior art racquet are well-known to have circular frames.

Regarding claims 5, 6 and 9, it is well-known in the tennis art that the string density of a racquet affects the power generated by the racquet. Specifically, a racquet with lower string density will generally create more power. As such, it would have been obvious to one of ordinary skill in the art to

Art Unit: 3711

vary the spacing between parallel strings, i.e., the string pattern density, of the Reedhead racquet for the desired power.

Response to Arguments

9. Applicant's arguments with respect to claims 1-6 and 15 are have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3711

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
